

AI for Lawyers

Use modern AI without compromising professional secrecy.

Built for law firms, in-house counsel, and legal professionals who take client confidentiality seriously.

The Problem

Lawyers handle privileged information every day: case strategies, client communications, contracts, settlement terms, litigation documents. Your duty of professional secrecy under national bar rules and EU law is absolute.

When you use public AI tools like ChatGPT, **you lose control of your data**. Whatever you type travels through servers you don't control, potentially outside the EU, and you cannot guarantee where it ends up. For lawyers bound by the GDPR, the EU AI Act, and professional conduct rules, that creates real risk. Professional secrecy can be compromised if confidential information is disclosed to third-party processors without adequate safeguards.

The Solution

TPAI Pro gives you modern AI assistance in a private environment. You connect through a secure private link, and the environment cannot send data to the public internet. Your client information stays protected within controlled boundaries.

Setup takes minutes. You connect through a secure app we provide, and you're in. Same familiar chat interface: type, paste, upload files. No new workflow to learn.

Use Cases for Legal Professionals

Task	How AI Helps
Document Drafting	Generate first drafts of contracts, motions, briefs, and correspondence. Refine and iterate quickly across multiple jurisdictions.
Legal Research	Explore legal issues, summarise case law, identify relevant statutes, directives, and EU Court of Justice precedents.
Contract Review	Analyse contracts for risks, missing clauses, unusual terms, GDPR data processing obligations, and negotiation points.
Document Summary	Summarise depositions, discovery documents, lengthy filings, regulatory submissions, or case files.
Client Comms	Draft client letters, engagement agreements, status updates, and plain-language explanations in any EU language.

Why It Matters

- **Professional secrecy.** Lawyers across EU member states are bound by strict professional secrecy obligations. Disclosing client information to third-party AI processors without adequate safeguards can constitute a breach of professional duty.
- **GDPR compliance.** Client data is personal data. Processing it through public AI tools without a lawful basis, a Data Processing Agreement, or adequate transfer safeguards violates Articles 5, 6, 28, and Chapter V of the GDPR.

- **EU AI Act.** The AI Act imposes transparency and risk management obligations on AI deployers. Using uncontrolled AI tools for legal work without governance frameworks creates regulatory exposure.
- **Client trust.** Clients expect their legal matters to remain confidential. Protecting that trust is fundamental to the profession across every jurisdiction.

Professional Responsibility

AI assists with drafting and research, but you remain responsible for all work product. Always review and verify outputs, especially legal citations. AI can hallucinate cases that don't exist. Not for final legal conclusions. Always verify citations using your standard research tools. You are the lawyer of record.

Security Quick Facts

Feature	Detail
Access	Secure connection app with certificate we issue. This is the only way to access the system.
Network	The TPAI environment has no public internet egress. Your data stays inside the private environment.
AI Models	AI model access occurs via private AWS connections, not public internet.
Encryption	Per-user encryption. Each user's content is encrypted separately, so no one else can access your data.
Admin Access	TPAI does not access your content by default. Any access requires your approval and is logged.
Compliance	Designed to support GDPR, EU AI Act, DORA, and ISO 27001 control frameworks. EU Evidence Pack available on request.

Pricing

TPAI Pro: \$299/month per user. Includes secure access, per-user encryption, and onboarding.

ROI: If it saves you 30 minutes a day on drafting, research, or document review, it pays for itself. That's time you can bill or time you get back.

Next Steps

Reserve your beta seat. We're opening a limited beta now. \$99 refundable deposit holds your spot and gets credited toward your first month.
