

AI for Lawyers

Use modern AI without compromising attorney-client privilege.

Built for solo practitioners, small firms, and legal professionals who take client confidentiality seriously.

The Problem

Lawyers handle privileged information every day: case strategies, client communications, contracts, settlement terms, litigation documents. Your duty to protect this information is absolute.

When you use public AI tools like ChatGPT, **you lose control of your data**. Whatever you type travels through servers you don't control, and you can't guarantee where it ends up. For lawyers bound by professional responsibility rules, that creates real risk. Privilege can be at risk if confidential information is disclosed to third parties without adequate safeguards.

The Solution

TPAI Pro gives you modern AI assistance in a private environment. You connect through a secure private link, and the environment cannot send data to the public internet. Your client information stays protected.

Setup takes minutes. You connect through a secure app we provide, and you're in. Same familiar chat interface: type, paste, upload files. No new workflow to learn.

Use Cases for Lawyers

Task	How AI Helps
Document Drafting	Generate first drafts of contracts, motions, briefs, and correspondence. Refine and iterate quickly.
Legal Research	Explore legal issues, summarize case law, identify relevant statutes and precedents.
Contract Review	Analyze contracts for risks, missing clauses, unusual terms, and negotiation points.
Document Summary	Summarize depositions, discovery documents, lengthy filings, or case files.
Client Communications	Draft client letters, engagement agreements, status updates, and plain language explanations.

Why It Matters

- **Attorney-client privilege.** Disclosing privileged information to third parties without safeguards can waive privilege. Public AI tools may not provide adequate protection.
- **Professional responsibility.** Bar rules require competent, confidential handling of client information. This extends to the technology you use.
- **Client trust.** Clients expect their legal matters to remain confidential. Protecting that trust is fundamental to the profession.

Professional Responsibility

AI assists with drafting and research, but you remain responsible for all work product. Always review and verify outputs, especially legal citations. AI can hallucinate cases that don't exist. Not for final legal conclusions. Always verify citations using your standard research tools. You are the lawyer of record.

Security Quick Facts

Access	Secure connection app with certificate we issue. This is the only way to access the system.
Network	The TPAI environment has no public internet egress. Your data stays inside the private environment.
AI Models	AI model access occurs via private AWS connections, not public internet.
Encryption	Per user encryption. Each user's content is encrypted separately, so no one else can access your data.
Admin Access	TPAI does not access your content by default. Any access requires your approval and is logged.
Data Location	Currently US. EU region planned for Q2 2026. Let us know if you want early access when it goes live.

Pricing

TPAI Pro: \$299/month per user. Includes secure access, data encryption, & onboarding.

ROI: If it saves you 30 minutes a day on drafting, research, or document review, it pays for itself. That's time you can bill or time you get back.

Next Steps

Reserve your beta seat. We're opening a limited beta now. \$99 refundable deposit holds your spot and gets credited toward your first month.
